Background

Home automation, or smart homes, is the concept of having the appliances and devices in your home act automatically without direct input being needed all the time. This is accomplished with the system known as the "Internet of things" or IoT.

IoT is extending the internet and connectivity beyond computers into everyday objects. These devices can communicate with each other, the internet and be remotely monitored and controlled.

Since it's rise in the last decade, many companies and start-ups have developed devices and systems for the smart home market.

Nidus offers a new way to control your smart home. With Nidus, nearly every appliance or device in your home can be controlled and monitored. Appliances, security devices and utilities can all be brought together and seamlessly controlled through the Nidus app, making your home safer and more efficient than ever before.

IoT software and hardware experience

Tech usage

User experience needs

- Ease of use
- Easy setup
- Fast interface

Pain points

- Over crowded menus
- Too many notifications

Job stories

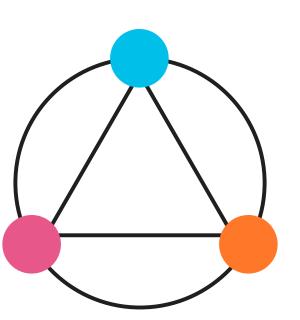

When I am at work, I want to check the flood and temperature sensor so I can make sure my home is ok.

When I am in my workshop, I want to operate the stereo and lights with my phone, so I don't have to stop what I am working on.

When I am at home, I want to monitor the energy usage of my appliances so I know how much energy I can save.

Core Strategy

Nidus provides a high quality and easy to use home automation service for middle and upper-class homeowners that provides safety, convenience and enjoyment for the home.

Themes and Messages

Modern

Nidus is a new and modern experience that will improve your home

Enjoyment

Using Nidus in your home is a fun and enjoyable experience that anyone can experience.

Ease of use

Nidus lets users take advantage of the smart appliances in their homes through an efficient and effective interface.

Interaction

Nidus lets you operate any compatible device from anywhere within your home.

Convenience

Nidus allows for completely custom automation for your home and can help you save energy.

Energy savings

Nidus lets you monitor your energy usage and helps you reduce the amount of energy your appliances use.

Automation

Nidus allows you to set up automatic events that can trigger from a wide variety of sources, such as your alarm going off or when you walk in the front door.

Safety

Nidus provides advanced security and monitoring features for you home.

Security

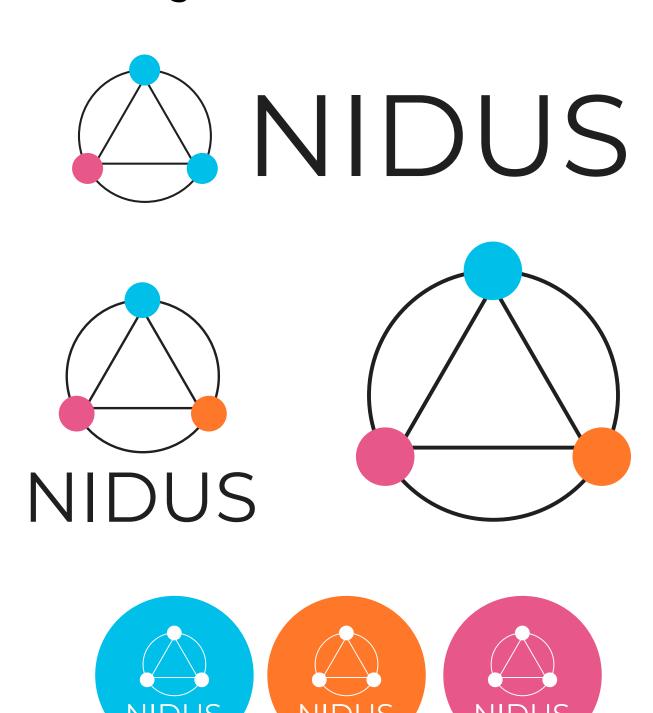

View your security cameras in real time or recordings and get live notifications from your security sensors.

Monitor

Use an array of sensors to monitor the status of your home and catch any disasters before they happen.

Branding Style Guide
